PROJECTS

Degree Ledger, Berkeley Requirement Tracker — *JavaScript, HTML/CSS, GitHub Pages*
- Launched a public web tool that checks completed coursework against every L&S major and CDSS minor at Berkeley
- Encoded the rules students most often miscount, including IGETC and Cal-GETC, transfer pathways, and unit ceilings
- Built it to run fully in the browser with no server or data collection, so students can track progress privately

Public Pickleball Court Demand Simulation — *Python, Discrete-Event Simulation*
- Simulated open-play queueing across five public parks, using NOAA weather data to model daily demand swings
- Tested court allocation and session length scenarios to quantify which levers cut player wait times the most
- Translated results into scheduling recommendations for park operators, written up as a published decision memo
